

TENT WITH EXTENDABLE WINDOWS
ABSTRACT

A tent (10) with extendable windows (14) having a main structure (12)
5 including a plurality of walls (16,18,20) which are oriented at a first angle (60)
with respect to a vertical reference. The tent (10) also includes at least one
window (14) which is extendable to a second angle (62) with respect to a vertical
reference, where the second angle (62) is a more negative angle than the first angle
(60) thus producing windows (14) which are horizontally extendable further than
10 the tent walls (16,18,20).
